

Calibration Services

Lifetime accuracy for your measurement equipment

Let us help you to maintain your instruments in perfect condition! Measurement accuracy directly affects process performance and life cycle costs of your measurement equipment. In order to keep your process performance valid your measurement equipment needs to be calibrated regularly.

With decades of experience of standard and accredited calibrations, Vaisala global service centers provide the services necessary to fulfill your quality requirements. Our accredited calibrations are recommended especially to fulfill your regulatory requirements.

We offer calibrations with adjustment. We can also offer full maintenance as an option. Calibration certificates are issued with calibrations.

Vaisala's offering

- Accredited, standard and customized calibration services
- Adjustment included
- Measurement results before and after adjustments
- Calibration certificate

Customer benefits

- High process performance and low lifetime costs through accurate measurements
- Planned calibration programs
- Known measurement traceability and calibration uncertainty

The alternative

- Unknown measurement accuracy
- Unutilized process performance
- Investment in your own calibration capabilities

This is the symbol of the Japan Calibration Service System under the measurement law. JCSS0123 is the accredited number of Vaisala KK aftersales calibration laboratory

How the services are carried out

Our Service Centers are located in North America, Europe and Asia. In these Service Centers we perform standard calibration services and repair.

Special and accredited calibration services are performed in our calibration laboratories located in Boston, MA, USA; Tokyo, Japan and Vantaa, Finland. The services are designed to fulfill also the accreditation standard requirements.

On-site calibration, if applicable, and repair services are available through our local offices.

Through service agreements, our calibrations are performed with agreed turnaround times and scheduled to fit your business requirements.

Our high class and traceable reference equipment to eg. NIST and documented procedures ensures best reliability and performance for you.

In addition, we can help you with repair and maintenance issues. You can also join our Calibration Reminder Program and we will notify you when the recommended calibration date is approaching.

Let us take care of the calibration and you can concentrate on the results.

Recommended add-on services

- Extended warranty
- Repair service
